

A close-up, profile view of a person's face, focusing on the mouth and teeth. The person is smiling, showing a row of bright, white teeth. The lips are a natural pink color. The background is a solid light blue.

Dental Products & Services Catalog

Our Mission

Our mission is to provide our customer, the dental professional, with products and services that make them more successful in the eyes of their customer, the dental patient.

At DenMat, we develop, manufacture, and directly distribute dental equipment, materials, instruments, lab services, and provide education to help dental professionals deliver beautiful smiles to patients worldwide... because we believe everyone deserves a healthy, beautiful smile.

Our Commitment to You

Our customers come first. Customer “service” is not enough for us. Our paramount goal is to ensure that doing business with DenMat is not only easy, but a pleasure.

DenMat's state-of-the-art global headquarters is located in Lompoc, CA, in the heart of California's Central Coast. Our 100,000 square-foot facility houses most of our North American operations, including manufacturing, lab, sales, marketing, warehousing, distribution, administrative services and executive offices.

*State-of-the-Art
Learning Center*

*State-of-the-Art
Production*

*State-of-the-Art
Lab Operations*

Our 26-seat Dental Learning Center is equipped with the latest in dental operatory equipment, along with high-definition audio/visual technology for hands-on and live-patient education on Lumineers and other minimally invasive esthetic dental programs.

We recently invested millions into the DenMat Lab, specifically in technology and equipment including scan and design software, 5-axis mills and 3D printers. This investment in CAD/CAM technology means consistent quality for you and your patients, along with faster turnaround times. Our goal is to be your first-choice dental laboratory for minimally-invasive esthetics today and for the future.

RESTORATIVES

Achieve outstanding esthetic results using DenMat's award-winning restorative products. Whether a cement, adhesive, or composite, dentists have been relying on DenMat for over 40 years as the source for superior restorative materials.

IMPRESSIONS

Choose DenMat materials for reliable, consistent impressions, every time. From simple cases to complex full-mouth restorations, our award-winning VPS materials and impression trays deliver the quality and performance you depend on.

WHITENING

DenMat's comprehensive line of both in-office and take-home whitening products will help you build your practice while delivering extraordinary results you and your patients will love.

ORAL HYGIENE

DenMat's oral hygiene line features the Rotadent ProCare™ power toothbrush, Pro-Select Platinum® Piezo ultrasonic scaler, ATRIDOX® locally-applied periodontal antibiotic and Pro-DenRx® fluoride gels, rinses and varnish. A two-level Soft Tissue Management® (STM®) CE offering rounds out this portfolio that is dedicated to the detection, prevention and treatment of periodontal disease.

INSTRUMENTS

DenMat acquired G. Hartzell & Son in 2014. These industry-leading precision products have long been preferred by clinicians for perio, hygiene, restorative, ortho, endo, and surgical dental procedures. Simply put, their quality is unparalleled.

MAGNIFICATION & ILLUMINATION

PeriOptix® has been manufacturing top-of-the-line loupe and headlight systems since the late 90s, a tradition that continues today after being acquired by DenMat in 2013. All our innovative loupes and headlights are manufactured in California and are made of cutting-edge components with strict quality standards.

SMALL EQUIPMENT

DenMat offers a diverse line of small equipment, including soft-tissue lasers, curing lights, and oral lesion detection systems. Carefully engineered and rigorously tested, our products have become must-haves in dental offices all over the world.

DENMAT LAB

Focused on esthetics, the DenMat Lab produces a full range of restorations for just about any need. From simple, monochromatic smile improvement to lifelike AACD-quality work, we deliver esthetics and function with every case.

CORE BUILD-UP

Core Paste

The Proven Time Saver for Core Build-Ups and Posterior Restorations

For over 30 years, Core Paste has helped thousands of dentists perform reliable core build-ups with complete confidence.

- Dual-cure formula
- Stackable viscosity and excellent handling characteristics
- Cuts like dentin
- Radiopaque

Before

After

Core Paste's stackable viscosity allows build-up without a matrix or core form!

Core-Post

Ideal for Core Build-Ups in Single-Tooth Restorations

Flexing like natural tooth structure, Core-Post dramatically minimizes tooth stress and fractures that occur with standard metal posts. Core-Post is available in both carbon fiber for increased posterior strength and tooth-colored glass fiber for anterior esthetics.

- Easy to cut and use
- Radiopaque
- Available in carbon fiber and glass fiber
- Five diameters: 1.0, 1.2, 1.4, 1.7 and 2.0mm

Tenure4G

Dual-Solvent Bonding Agent

4Greater bond strength and sensitivity control, turn to Tenure4G, DenMat's next generation of the popular Tenure MPB bonding system. Tenure4G is a 4th generation multi-purpose, self-cure adhesive system for bonding any resin restorative to all intraoral surfaces. Tenure4G's formulation contains added ethanol to reduce patient sensitivity. Additionally, it has shown improved bond strength, to give you more confidence in your composite restorations.

- Ethanol and acetone for strength and sensitivity control
- Improved bond strength
- Self-cure
- Easy to use

tenure[®]4G

Tenure MPB Multi-Purpose Bonding System

Tenure Multi-Purpose Bonding System has high bond strength and excellent retention, along with significant reduction of microleakage and post-operative sensitivity, making it the bonding agent of choice for thousands of clinicians.

- Bonds to all surfaces
- Versatility
- Complete self-cure
- Easy flow
- Low film thickness

Tenure Uni-Bond® Self-Etching Bonding and Sealing System

Tenure Uni-Bond self-etching bonding system simplifies all direct bonding applications with anterior and posterior composites. It is ideal when cementing crowns and bridges with self- and dual-cure resin cements. Tenure Uni-Bond is compatible with self-cure, dual-cure and light-cure composite materials.

- No separate etching required
- High bond strength to all intraoral surfaces
- Less chair time
- Non-sensitivity formula
- Gloss-N-Seal seals and glosses final restoration

Tenure Quik® Single-Bottle System

Tenure Quik's formulation provides a surface-penetrating, low-viscosity bonding agent. Once applied to etched enamel and dentin, you can be assured that Tenure Quik with Fluoride will completely penetrate and seal the tooth interface.

- High bond strengths to all surfaces
- Single component saves time
- Simplified placement
- Compatible with self-cure, dual-cure and light-cure composite restorations

Gloss-N-Seal® Light-Cure Sealant

Gloss-N-Seal is a light-cure, low-viscosity, surface penetrating sealant with exceptional abrasion resistance. It penetrates and seals to reduce composite wear, marginal staining and breakdown.

- Sealing composite restorations
- Resurfacing old composite restorations
- Coating provisional for instant glaze finishes

Infinity

All-Purpose Resin-Ionomer Cement

Infinity is the all-purpose resin-ionomer cement that is great for all zirconia and metal restorations. It is also ideal for porcelain-to-metal, all-ceramic, resin and ceramic inlays/onlays, cast metal and all types of posts.

- Cleans up in seconds
- Self-adhesive
- Dual-cure formula
- Low film thickness
- High bond strengths to all surfaces

Simply syringe Infinity directly into the crown and seat.

Removal of excess cement is fast and easy — no drilling or scraping required!

Technique for Bridge Cementation Using Infinity

Clean tooth surfaces thoroughly
Dispense Infinity into the restoration
Note: for inlays/onlays, syringe Infinity directly onto the tooth

Seat the restoration under occlusal forces

Briefly light cure the excess material extruded from the margins for 1 – 3 seconds until it reaches a gel consistency

Remove the gelled excess Infinity with an instrument

Use dental floss to remove excess material interproximally

Continue light curing process or allow the restoration to set for 2 – 3 minutes

Tenure & Ultra-Bond Plus
A winning combination for proven reliability and long-term performance!

UltraBond Clear Light-Cure Resin Cement

UltraBond Clear is a light-cure resin cement formulated for bonding Lumineers, as well as other porcelain or composite veneers. Featuring a viscosity developed for optimal handling when placing veneers, and highly transparent clear and natural shades, UltraBond Clear is sure to provide the final esthetics you and your patients will love.

- Easy-to-use, no-mix, light-cure application
- Excellent color stability

Ultra-Bond Plus Restorative Resin Cement

Ultra-Bond Plus is a multi-purpose, dual-cured, ADA Type II restorative, as well as a cement. Ultra-Bond was custom designed to match the physical properties of Cerinate Porcelain and tooth structure for long lasting restorations.

- Prevents marginal staining and pop-offs
- Creates long-lasting, durable restorations
- Ideal cementing/luting medium for crowns/veneers
- Protects against wash-out
- Exceptional ease of use

Nuance Universal Universal Light-Cured Restorative Material

Nuance is a light-cured micro hybrid composite that simplifies the composite restoration process like never before. It's translucent when thin and opaque when thick. One body shade can be used for an entire restoration with flawless, natural-looking results.

- Superb handling properties
- Creamy consistency easily spreads
- Available in nine shades
- Convenient flip-top syringe or pre-loaded tips for minimal waste

After

Nuance FLOW

Highly Polishable Flowable Composite

Nuance FLOW composite material is ideal for the pulpal or axial layer in posterior restorations. It has a unique self-leveling viscosity that allows for easy placement without running or dripping and it has optimal compatibility with Bis-acrylic materials.

- Easy to place
- Excellent viscosity
- Radiopaque
- Convenient syringe delivery
- Available in eight shades

SplashMax

The Ultimate VPS Impression Material for Accuracy, Reliability and Value

SplashMax is a super VPS impression material that offers instant hydrophilicity, because dead-on accuracy is needed when the material first comes in contact with dentition. In independent testing, SplashMax demonstrated the lowest contact angle almost immediately.

- Extreme wettability
- Maximum tear strength and elasticity
- Excellent dimensional accuracy
- Four high-contrast viscosities
- Wild berry scent

Splash!

A Hydrophilic VPS Impression Material You Can Count On

Splash! is the ideal choice for clinicians who demand reliability and value in a VPS impression material. It features excellent flow properties, tear strength and a scent that patients love.

- Super hydrophilic
- Two set times (2:15 and 4:30)
- Available in five high-contrast colors and four delivery methods
- Wild berry scent

5 great tips for taking accurate impressions with *all* our impression materials!

- 1** Line plastic trays with an adhesive before extruding the material into the tray to prevent separation of the impression from the tray.
- 2** Avoid overfilling trays with impression material — only fill to the top of the tray and limit the amount of material extruded onto the pallet (for uppers). This saves material and prevents patient from gagging.
- 3** Use intraoral tips when applying the light body wash to ensure the material flows into all areas of the preparation.
- 4** Seat the impression on the front and back teeth simultaneously to ensure ultimate accuracy.
- 5** Let the impression set for the full duration of working and setting time to avoid the risk of pulls or tears. Using a timer to prevent removal of the impression too early is always a good idea.

Bite Registration Materials

Stability, Accuracy and Rigidity... Everything You Need for Bite Registrations

DenMat offers a complete line of VPS bite registration materials to meet all of your procedural needs. Easy to extrude and trim, these materials are used for closed, open- and double-bite registrations.

- Extreme accuracy and stability
- Fast set times
- Easy trimming

Mousse-like Consistency

Vanilla Bite™

- Rigid
- Quick set (0:55)
- Ideal for 1 – 2 unit cases
- Extremely accurate and dimensionally stable

Medium Rigidity

Chocolate Bite™

- Slower set time (1:30)
- Ideal for taking full-arch quadrant registrations
- Allows for longer working times

Transparent & Flexible

Clear Bite™

- Transparent
- Ideal for temporary matrix (2:30 set time)
- Enables light passage for curing
- Great visibility of voids or bubbles

Super Rigid

MegaBite®

- Very rigid VPS bite registration material
- Fast set time (0:55)
- Exceptional accuracy
- Ideal for centric occlusion and centric relation registrations
- Minimized occlusal adjustments

DenMat® offers a complete array of oral hygiene products to meet the needs of you and your patients. From our ultrasonic scaling system to our power toothbrush that allows patients to maintain their regimen at home, we've got you covered.

Whether in your chair or at home, offer your patients superior clinical care.

POWER TOOTHBRUSHES

Rotadent ProCare

The Professional Rotary Toothbrush

For over 25 years, the Rotadent power toothbrush has established itself as the premiere at-home solution for periodontal maintenance. DenMat is proud to introduce the latest generation of the Rotadent toothbrush: Rotadent ProCare.

Rotadent ProCare is a true extension of in-office procedures, helping you ensure that your patients maintain and improve their oral health between office visits. It's also been shown to be a "one-step" system, which simplifies and streamlines homecare for patients. Here are just a few of the proven facts from clinical studies:

Rotadent...

- is the only power toothbrush clinically proven to be as effective as brushing and flossing combined¹
- removes 92% of plaque in the first minute of brushing²
- consistently out-performed other brushes in in-vitro stain removal from both flat and interproximal surfaces³
- increases patient compliance with homecare and recare appointments⁴

Unlike competitive power toothbrushes, Rotadent ProCare is available to patients **EXCLUSIVELY** via dental professionals.

Rotadent
ProCare™
The Professional Rotary Toothbrush

How does it work?

Proprietary MicroFilaments™

Each Rotadent brush head has **4,577** proprietary MicroFilaments that mechanically sweep away plaque and biofilm. Each MicroFilament is 1/3 the width of a traditional toothbrush bristle.

Ordinary Bristles

Rotadent MicroFilaments

Rotadent ProCare MicroFilaments effectively reach below the gumline and interproximally.

Unique Handle Design

The Rotadent toothbrush was designed to be an at-home extension of the Prophylaxis handpiece that is used to fight plaque and control disease during Hygiene appointments.

3 Brush Head Options

Hollow-Tip

- Designed for cleaning and polishing surfaces of the teeth and sweeping under the gumline
- Flat, cup-like design makes it ideal for absorbing and applying oral medication

Short-Tip

- Effective for cleaning and polishing surfaces of the teeth
- Able to deliver oral medication more deeply into periodontal pockets and between teeth

Long-Tip

- Most effective for targeting hard-to-reach areas
- Sweeps plaque and debris away from braces, multi-unit fixed bridges or between teeth

Who do you dispense to?

Rotadent is not just a solution for periodontal patients. It is truly optimized to treat all patient types.

Orthodontic

- Controls gingivitis and plaque that build up around braces⁵
- Helps minimize staining and decalcification that many Ortho patients experience⁶

Implant

- Safe home oral hygiene regimen to use on implant surfaces⁷
- Reduces surface abrasion, which may lead to reduced buildup of plaque⁷

Esthetic

- Uses less brushing force than competitive brushes⁸
- Ideal solution for veneer patients with extra-sensitive soft tissue

Restorative

- Safe for use on dental restorations, including crowns, fillings and bridges
- Effectively balances low abrasivity with high-cleaning efficiency³

ULTRASONIC SCALERS

PSP® Pro-Select
Platinum®
PIEZO ULTRASONIC

PSP Piezo Ultrasonic Scaler

Two instruments in one — ultrasonic scaling and heated irrigation system. PSP is a superb piezo ultrasonic scaling solution and the only system that combines scaling with heated subgingival irrigation. Upgrade your practice today.

PSP — Piezo Ultrasonic Scaler

Easy on you. Easy on your patients.

- 1 Patient comfort.**
Patient acceptance is increased because of PSP's high-frequency linear tip motion, quiet operation, minimal water output, and effectiveness with light, lateral pressure.
- 2 Clinician comfort.**
The lightweight, ergonomic handpiece is designed to reduce muscle strain. Less pressure is required to effectively scale. The clinician can work more efficiently and can perform gross debridement and definitive root planing in one step, without changing tips.
- 3 Closed system.**
Multi-fluid system offers choice of using distilled water, chlorhexidine and fluoride in a simple, three medicament bottle design. Because the fluid delivery system is closed, infection control is enhanced and the risk of biofilm contamination is reduced.

Gum Disease Symptoms

Healthy

Signs of a healthy mouth:

- Pink gum color
- Gumline hugs teeth tightly
- No bleeding

Gingivitis

Symptoms of gingivitis:

- Gums bleed
- Inflamed red gum tissue
- Bad breath and bad taste

Early Periodontitis

Symptoms of early periodontitis:

- Gums may pull away from teeth
- Inflamed red gum tissue
- Bad breath and bad taste
- Bone loss around teeth
- Pockets of bacterial infection of 4mm between teeth and gums

Moderate Periodontitis

Symptoms of moderate periodontitis:

- Periodontal abscesses
- Gums recede and teeth look longer
- Loose or separating teeth
- Bad breath and bad taste
- Pockets of bacterial infection from 4 to 6mm deep

Advanced Periodontitis

Symptoms of advanced periodontitis:

- Mobile or loose teeth
- Persistent bad breath and bad taste
- Exposed roots and sensitive to hot and cold
- Loss of the adjacent supporting bone
- Pockets of bacterial infection in excess of 6mm deep

PREVENTATIVES

Pro-DenRx 2.0% Neutral Sodium Fluoride Rinse* In-Office Fluoride Rinse

Comes in easy-to-use single bottle with pre-measured pump to eliminate messy mixing. Safe to use on patients with restorations. Available in 64oz bottles. Mint or berry fresh flavor.

Pro-DenRx 0.2% Neutral Sodium Fluoride Rinse* Homecare Fluoride Rinse

Homecare fluoride rinse for caries prevention with plaque-controlling formula. Ideal for cosmetic patients. Available in 16oz bottles. Mint flavor.

Pro-DenRx 0.63% Stannous Fluoride Rinse* Homecare Fluoride Rinse

Homecare fluoride rinse that may prevent decay, inhibit plaque and reduce sensitivity in gums. Can be used as a rinse or with an irrigator. Available in 10oz bottles. Mint flavor.

Pro-DenRx 0.044% Daily APF Rinse* Homecare Fluoride Rinse

Homecare rinse with high fluoride uptake. Great option for patients undergoing orthodontic treatments. Available in 16oz bottles. Mint flavor.

Why ATRIDOX?

- ✓ Reduces probing depth
- ✓ Improves clinical attachment
- ✓ Less bleeding upon probing

ATRIDOX®
(doxycycline hyclate) 10%

ATRIDOX

Focused Periodontal Disease Treatment

ATRIDOX (doxycycline hyclate) 10% is a major advancement in the treatment of periodontal disease. It is an easy-to-use, cost-effective, locally applied antibiotic (LAA) that is placed gently below the gum line into periodontal pockets where bacteria thrive.

ATRIDOX is the *only* LAA that is clinically proven to achieve all three of the following outcomes in treating adult chronic periodontitis:

- Gain in clinical attachment*
- Reduction of probing depths*
- Reduction of bleeding on probing*

ATRIDOX Key Features

- 1 Cost per site treated is less expensive than leading competitors**
- 2 Flows freely and easily to the bottom of pocket to adapt to root morphology
- 3 Controlled release of doxycycline for a period of 21 days*
- 4 Bioabsorbable — no removal required
- 5 Allows precise placement for targeted therapy
- 6 Dosing flexibility allows for treatment of multiple sites with a single syringe

ATRIDOX is the only LAA gel that flows deep into infected pockets

Perio probes have high-contrast marking for clear visibility

Sensor probes alert clinicians when universal pressure has been applied

Pro-DenRx Probes

Perio Probes

Designed for increased sensitivity, accuracy and patient-friendly comfort, these probes incorporate the latest thermoplastic technology. The black markings provide high-contrast for more accurate pocket measurements, especially in the distal regions of the oral cavity.

Sensor Probes

These innovative probes make it possible to maintain consistency of probing force between clinicians and examinations.

DenMat® proudly offers Hartzell® dental and surgical instruments. Carefully fashioned by skilled craftspersons, our instruments have maintained the same high standards of manufacturing excellence established by their founders in 1935.

Only the highest-quality components and production methods are used in manufacturing our instruments, yielding precision and consistency unparalleled in the industry.

HYGIENE INSTRUMENTS

Hygiene Instruments

Precision Hygiene Instruments

All of Hartzell's hygiene instruments are manufactured, polished and finished in the USA. With consistent bends and second-to-none edge-retention, these precision instruments will become a standard part of your perio armamentarium. Use them during routine prophylaxis appointments, or for scaling and root planing.

*Instruments are delivered pre-filled in the cassette and are not replaceable. Above photo is not representative of the assortment of instruments in the HZ-SRPKIT. Additional instruments to round out your armamentarium can be found on the opposing page.

DenMat®

Certified PeriOptix® Loupe Specialist

A Certified PeriOptix Loupe Specialist can help you get fitted with the perfect flip-up or through-the-lens loupes

Pupillary Distance

Pupillary Distance (PD) is the measurement, in millimeters, between the centers of the pupils in each eye. This measurement can be done quickly and painlessly by your local PeriOptix representative or by any optometrist. Note: If measured by an optometrist make sure the measurement is taken at infinity (∞).

Right PD	Total PD	Left PD

Working Distance

Working Distance is the measurement at which the user is comfortable working. This distance should be calculated while the doctor is in an upright, and comfortable position that keeps the clinician's ergonomics in check.

S	12 – 16 in (30 – 40 cm)
R	14 – 18 in (35 – 45 cm)
L	16 – 22 in (40 – 55 cm)
XL	18 – 22 in (45 – 55 cm)

Looking to perform more predictable pain-free dentistry?

DenMat's soft-tissue diode lasers promote safer, healthier tissue management for your patients while increasing efficiency in your practice.

Benefits of Laser Dentistry Include:

- Minimized need for topical anesthetic
- Improved access and field of vision
- Minimal tissue damage
- Minimal post-op sensitivity
- Reduced healing time and treatment time in many cases
- Keep procedures in house and enjoy better patient compliance
- Incremental revenue through Laser Assisted Periodontal Therapy (LAPT)
- Plus many more!

Sapphire® PAC Curing Light

The Sapphire light is a versatile and powerful plasma-arc curing and whitening system, all in one package. Light-cured composites cure in 3 – 5 seconds and dual arch bleaching is completed in one office visit. Fast, convenient, comfortable, economical... unparalleled.

- No harmful UV rays and no need for skin protection
- Whitens individual teeth as well as full arches with the Sapphire Whitening Crystal
- Super-fast curing in 3 – 5 seconds, saving an estimated \$40,000/year in chairtime²
- Curing power that goes the distance. Effective curing from up to 10mm with greater power than any other light tested from any distance¹
- Fully cures resins in less time than our competitors¹
- Reduces finishing time for Lumineers up to 50%

The NEW DenMat Lab will partner with you to create one-of-a-kind smiles using the latest minimally-invasive technology and techniques.

Send us your challenging cases and let us guide you with our new A.R.T. process, which helps make the complex simple. Signature Service is our new premium level of esthetics designed to meet your high standards.

Lumineers® and Snap-On Smile® are two of our most popular brands. Our experienced technical consultants are here to help you with design, product information and specifications, as well as any other questions you may have.

Let us partner with you for all your esthetic needs.

LUMINEERS®

The #1 patient-requested veneer

**Veneers**

DenMat Lab, the innovator of thin veneers with over 30 years of experience, is here to help you with your challenging esthetic cases. Lumineers technology and processes allows you to provide beautiful smiles with the greatest preservation of tooth structure possible. We now offer our new A.R.T. and Signature Service processes, as shown on the next page. Send us a case and allow us to show you why Lumineers is the #1 patient requested veneer.

Materials

- Cerinate II lucite-reinforced porcelain
- Lithium disilicate

Preparation Techniques

- No prep
- Minimal prep
- Traditional prep

Fabrication Techniques

- Pressed
- Layered

LumiZir®

Solid Beauty

**Permanent Restorations**

LumiZir is our brand of zirconia, available in full-contour restorations made from one monolithic piece of zirconia. LumiZir Natural offers high translucency and 1160 MPa strength. We also offer LumiZir stacked with porcelain and lithium disilicate for a more customized esthetic case.

We offer several materials for permanent restorations that will allow you to customize your cases to optimize beauty and strength.

Now available in:**Crowns**

- LumiZir/LumiZir Natural™
- Lithium disilicate
- Porcelain fused to metal (PFM)
- Captek
- Full Cast

Bridges

- LumiZir
- Lithium disilicate
- Porcelain fused to metal (PFM)
- Maryland

Inlays/Onlays:

- Lithium disilicate

snapon
smile.

Changing Smiles...Changing Lives.

**Provisionals**

Many dentists regard temporization as one of the most difficult aspects of full-mouth restoration. Snap-On Smile is not only an excellent provisional, it also provides patients with exceptional esthetics. It can last for years, yet is affordable enough to be temporary. For patients who are hesitant to commit to more involved restoration treatments, Snap-On Smile gives them the experience of living with better function and superior esthetics.

- Full or partial arch
- Cosmetic enhancement
- Implant provisional
- Removable partial denture
- Non-invasive

97% Excellent or Good by Clinicians Report†

81% of 31 CR Evaluators stated they would incorporate Snap-On Smile into their practice.

Snap-On Smile was primarily used by CR Evaluators for:

- Provisional restoration
- Short-term esthetic improvement
- Long-term esthetic improvement
- Diagnostic set-up

*Data on file.

†An independent, non-profit dental education and product testing foundation: Clinicians Report,® February, 2012. For the full report, contact DenMat.

To order, call **1-800-4DENMAT (1-800-433-6628)** or visit www.denmat.com

A.R.T. (Additive-Reductive Template) is DenMat's new, innovative process designed to make even complex veneer cases simple. This revolutionary process provides a "blueprint" from the Lab to the dentist to ensure optimal, easy to follow, conservative prepping for each individual case.

A.R.T. is available in 3 options to suit all: no prep, minimal prep, and idealized prep. Idealized prep is for advanced cases or combo cases that include crowns, bridges, implants, etc.

Signature Service is a premium level of esthetics and service specifically designed to provide superior results, even for the most demanding cases.

- Case supervision by master ceramist Brad Jones, FAACD
- Advanced color-matching
- Enhanced artistry and nuances
- State-of-the-art processes for working with porcelain
- Smile-design technical specialists with advanced training

RSVP Service

- Reserve your case in our production schedule
- Request a specific technician to design all of your cases with a reservation
- No-charge digital photographs during wax or completed phase
- Able to apply various occlusal philosophies to case design (Dawson, LVI, OBI, and Pankey)
- Lumineers with Signature Service Pricing: \$279 per unit vs. \$239 per unit for standard Lumineers – boutique lab results for a better value!

LumiGrip®

Veneer Placement Tool

The gentle way to place Lumineers, or any veneer, with ease and confidence! The sleek LumiGrip is an ergonomically designed, fully autoclavable, anodized aluminum handpiece that maximizes suction forces from standard saliva ejector and HVE lines in order to securely and delicately assist in the stress-free and precise placement of “contact lens-thin” Lumineers. Held like a pen, the powerful suction force directed through the soft, baffled, silicone cup securely grips the veneer, enabling precise placement. An effortless and slight retraction of the index finger against the rotary valve on the body of the handpiece is all that is needed to turn off the suction and release the veneers.

Ceri-Saw & Ceri-Sander Interproximal Finishing Tools

These tools are particularly useful for interproximal finishing of multiple veneers and separating fused composite restorations. The ideal handle allows for easy manipulation of the thin blades that give you total control to prevent accidental slips and injury. Designed for fast, easy-to-use, interproximal finishing, the Ceri-Saw and Ceri-Sander are safe and more comfortable for the patient than traditional disc and strip systems.

Ceri-Saw

The Ceri-Saw is used for interproximal finishing of multiple laminates and separating fused composite restorations. Its exceptionally thin, sharp saw blades can easily cut through composite without concern for cutting porcelain.

Ceri-Sander

The Ceri-Sander is a single-sided, diamond coated strip in fine and ultra-fine textures. The Ceri-Sander is for final finishing and smoothing of the interproximal.

Lumineers® Finishing Kit Veneer Placement Finishing System

This finishing system is specially designed for Lumineers placement. However, it's a great set of tools for any veneer placement. This all-inclusive kit makes the finishing process quicker and much smoother than do other tools on the market today. Each tool is specifically designed to finish the laminate surface and interproximals without causing the patient pain or damaging the laminates.

Matrix Strips Interproximal Strips

Matrix Strips enclose the restoration, creating a temporary interproximal surface to prevent the spread of filling material.

Thriving In This Economic Environment

Our Economy

Your

At DenMat®, we firmly believe that we are only successful if we make you, our customers, more successful practitioners and business owners. To that end, we offer a full suite of practice-building and continuing education services designed to elevate your standard of care and grow your practice.

The Lumineers Smile Discovery Program® (LSDP) is designed to ensure that your practice can take maximum advantage of the extensive consumer brand awareness of Lumineers. From targeted national advertising campaigns to customized marketing support and tools to assist in case acceptance, LSDP is your machine for practice growth.

DenMat Education provides a wide variety of innovative and comprehensive education programs for dental practitioners. These educational programs include national conferences, regional hands-on training courses, live patient placement courses, webinars and more. DenMat Education strives to provide educational environments that support truly practice-changing learning that not only enhances clinical practice, but also has a powerful impact on a practice's bottom line.

LSDP — The Premier Practice-Building Program in Dentistry

The Lumineers Smile Discovery Program (LSDP) is designed to ensure that your practice can take maximum advantage of our consumer brand awareness. From targeted national TV advertising campaigns to customized print ads and emails, LSDP is your machine for practice growth. You'll get what you need to drive your practice to new levels, including:

- Tools for case acceptance
- Patient demand generation
- Comprehensive practice marketing support
- FREE monthly product

LumiSmile® — The Key to Case Acceptance

Give your patients the unique experience of seeing their new, perfect smile — instantly — with the LumiSmile Program. Your patients are up to 500% more likely to say yes to Lumineers or other cosmetic procedures after seeing their LumiSmile Digital Smile Makeover.

National Advertising

Targeted national TV advertising and on-line pay-per-click marketing are designed with one objective in mind: drive new patients to your office. The campaign drives literally millions of impressions a year through consumer media. In fact, Lumineers.com is often the #1 ranked site for “veneers,” the top dental search term on Google. Our website and doctor locator capture interest and make sure new patients discover your practice.

“It’s like we’ve got a national advertising agency working for our practice!”

— Dr. Peter Harnois, Hinsdale, IL

LSDP Member's Website

The LSDP Portal gives you access to easy-to-use ad templates and emails that you can customize for your practice, phone scripts for your team to use to communicate your services and practice-growing marketing tips and tools.

Trained Lumineers Smile Discovery Program consultants will help set up and train your office to make sure you're getting the most out of this valuable aspect of the program.

LumiDays

LumiDays are sponsored Open House events held in your practice to show potential patients what you and Lumineers can do for their smiles. We support your LumiDays with promotional flyers and actual LumiSmile makeovers during the event. It's a proven way to drive new cases!

You'll receive FREE monthly product as a member of LSDP _____

Continuing Education

Whether you want to increase your esthetic production, hygiene production, or both, we have a course that's right for you. Learn what's new *and* how to incorporate it into your practice — starting Monday morning!

Soft Tissue Management®

A healthy smile is your business...
helping you succeed is ours.

Would you like to:

- 1 Get more patients to say "YES"?
- 2 Increase hygiene production while seeing fewer patients?
- 3 Empower your hygiene team to be the driver of elective procedures?
- 4 Adapt the latest technologies and techniques for non-surgical perio therapy?
- 5 Energize, motivate and inspire your entire office staff?

Then add one of DenMat's Soft Tissue Management (STM®) Continuing Education courses to your calendar. This 1-day workshop features tried and proven methodologies that will revolutionize your practice and turn your current hygiene program into a profit center. The latest technologies and techniques will be presented that will teach your staff how to perform non-surgical perio therapy and bill appropriately for the services you are already providing to your patients. You will learn first-hand from one of a select group of speakers that

have successfully implemented this program in their own practices, and leave the course with a new perspective and motivation to make Soft Tissue Management a more central part of your service offering.

Your patients will thank you. Your team will thank you. And your hygiene production will transform. Get inspired at a DenMat STM course near you.

Experience one-on-one demos of STM products and techniques!

Mastering Minimally-Invasive Smile Design

Join us for two days of powerful continuing education and learn:

- Best practices from your peers who have built highly successful practices with minimally-invasive esthetics in a challenging economy.
- Advanced esthetic dentistry, including case selection, smile design, preparation using the new Additive-Reductive Template (A.R.T.), and final finishing and seating of minimally-invasive veneers.
- Practice marketing, patient communication, case acceptance and practice management skills to build a successful esthetics-oriented dental practice.

13
CE CREDITS

Before

After

Before

After

Learning Objectives

- Learn both clinical and business implementation all in one course – all you need to make a difference in your practice right away!
- Experience engaging and unique hands-on training with different veneer case types and small equipment and material demonstrations.
- Discover the new additive-reductive template (A.R.T.) and process to minimize chair time and enable the most conservative preparation with the best esthetic outcome.
- Make complex cases simple — all with minimal tooth reduction. Learn to tackle challenging alignment and asymmetrical arch forms, and many other complex cases.
- Participate in class discussions about case planning; bring your cases for personalized evaluation!

DenMat Education is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by AGD for Fellowship, Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 8/1/2014 to 7/31/2017. AGD Provider #218048

How to Sign Up

Go to www.denmat.com. New users must select “New Customer” from the navigation bar in the upper right. To use DenMat’s on-line system we must first verify your office and dental information. Please complete the form and press “Sign Me Up!”

Once the form is submitted, we will verify your information and send your login credentials to the e-mail address you provide on the form or another already on file. During working hours (5 a.m. to 5 p.m. PST) this process typically takes less than 30 minutes. On weekends and holidays, your log-in credentials will arrive early the next business day.

Please Note: Group practice or international customers, please follow your current ordering procedures, as e-commerce is not able to process these orders at this time.

How to Log In

Users log in by submitting a username and password in the “Log-in” field provided in the top right area of the navigation menu and pressing the “Arrow” button.

How to Place an Order

DenMat recommends logging in as this allows users to see pertinent data such as “My Price, Quantity and LSPD Price,” and to be able to “add to cart,” “add to list,” or “checkout” from the product tab or the “Fast Order” page.

There are three ways to place an order on the DenMat website.

- 1 Select a product from the top navigation bar and select “Order Now” from the product tabs and follow the checkout workflow.
- 2 Select the “Fast Order” button from the top navigation bar, choose your product tab and select “Buy Now” and follow the checkout workflow.
- 3 Use the “Product Search” tool from the top navigation bar.

Terms & Conditions

DenMat Lab Terms & Conditions

Please see our complete terms and conditions available at www.denmat.com

Ordering

For the best possible custom-made product, please make sure you are ordering the correct size, quantity, shade, and material application. If we make an error or if your order was inaccurate, we will make every attempt to remedy the error as quickly as possible. All orders may be subject to shipping and handling charges. "Rush" orders or orders requiring special handling may be subject to additional charges.

Product Inspection

We encourage you to inspect the product prior to acceptance. You accept the product if you use it in any way, including placing the product in a patient's mouth or making modifications to it. If you do not notify the DenMat Lab of your rejection and do not return the product to the Lab within 15 business days after your receipt of the product, you will be deemed to have accepted it.

Limited Warranty

While we believe you and your patient will be delighted with our products, we understand that 100% satisfaction is not always possible. In such event, we are happy to repair or replace, at our discretion, any product that is defective or does not meet your specifications. This is your exclusive remedy. If we are at fault, there will be no charge for the repair or replacement (and no charge for shipping). If we are not at fault, there will be a 50% charge for our cost to repair or replace (in addition to the original charge for the product, plus shipping). This limited warranty is in effect from the date you received the product and for a period of 90 days from that date.

For all DenMat Lab restorations (excluding Snap-On Smile), DenMat's warranty obligation, with respect to an original restoration affixed to a particular tooth, is limited to one (1) time replacement for that restoration within five (5) years.

For Snap-On Smile, the warranty obligation is limited to one (1) time replacement of the original Snap-On Smile (both full and partial arches) within one (1) year and covers any defects in materials or workmanship.

These limited warranties are in effect from the date you received the product and are between DenMat and the doctor. There will be no handling charge for warranty work for the first 90 days of the warranty period. After the 90 days, there will be a \$37 handling fee (US dollars) plus shipping (depending on current shipping rates) on all warranty claims.

This limited warranty is in lieu of all other warranties, express or implied and is void if the product is improperly stored or used. There are no implied warranties of merchantability, fitness for a particular purpose or otherwise. Before using this product, you agree that it is your responsibility to determine whether it is suitable for the intended use and will assume all risk and/or liability associated with use of or inability to use the product. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages so this limitation or exclusion may not apply to you.

DenMat Professional, Consumable & Equipment Terms & Conditions

Please see our complete terms and conditions available at www.denmat.com

Ordering

So that we may provide you the best service possible, please make sure you are ordering the correct size, quantity, shade, and material application. If we make an error or if your order was inaccurate, we will make every attempt to remedy the error as quickly as possible. All orders may be subject to shipping and handling. "Rush" orders or orders requiring special handling may be subject to additional charges.

Cancellations

To cancel an order that has not shipped, please call your Customer Service Representative. If your order has not shipped, we will cancel it. If your order has shipped, please obtain a Return Authorization Number from your Customer Service Representative because we cannot accept returns without prior authorization. Return Shipping Labels will be provided to you if an order was sent to you in error.

Limited Warranty

Professional Consumable Products

While we believe you and your patients will be delighted with our products, we understand that 100% satisfaction is not always possible. In such event, we are happy to replace or refund your purchase price of any DenMat professional consumable product that is defective if you notify us within 30 days of the purchase date. This is your exclusive remedy.

Equipment

We are happy to diagnose and repair DenMat equipment found defective within the equipment warranty period. Equipment outside of the warranty period will be evaluated and subject to the results of evaluation. DenMat will contact you with a price quotation for the cost of repairs or replacement, if applicable. Any repairs may be made with new or refurbished parts at the sole discretion of DenMat.

- Shipping and handling charges for equipment within warranty will be paid for by DenMat.
- Shipping and handling charges for equipment outside warranty and for professional consumable products is the responsibility of the customer.

This is a limited warranty (for both Professional consumable Products and Equipment) and is in lieu of all other warranties, expressed or implied, and is void if the product is improperly stored or used. There are no implied warranties of merchantability, fitness for a particular purpose or otherwise. Before using this product, you agree that it is your responsibility for determining whether it is suitable for the intended use and will assume risk and liability associated with use of the product. You agree that DenMat will not be liable for any economic, incidental or consequential loss or damage that arises out of the use of or the inability to use its products. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages so this limitation or exclusion may not apply to you.

Payment Terms

We appreciate payment on your account within 30 days of Invoice date. In the event your account balance is past due, we reserve the right to impose a service charge of 1.5% per month to your account until payment is brought current. In the event your account balance is substantially past due and we have no choice but to refer your account to another party for collection, please be aware that you will be responsible for any collection fees and expenses.

Product Return Policy

Consumables Returns (porcelain, materials, etc.):

- Product returned within 30 days of purchase will be accepted for full refund. No questions asked.
- If the product is defective and you notify us after 30 days, we would be happy to credit your account upon our confirmation that the product is defective.
- We are unable to accept returns for products beyond 60 days. Returns received 31– 60 days will be given a 50% credit return.
- Please be aware that your account may be subject to shipping charges.
- Promotional coupon credit has an expiration date of six (6) months from time of redemption.
- Concession credits have an expiration date of six (6) months from time of application.
- Incorrect product shipped to a customer: Products will be promptly replaced with correct product upon DenMat issuing RMA number. If the incorrect products have not been received by DenMat within 30 days of issuance of the RMA number, the customer will be charged for the products. All returned products must be in original, unopened condition.
- Damaged products: Products that have been damaged in-transit to the customer will be replaced, within 30 days of receipt by the customer, at no charge to the customer by DenMat.

Equipment Returns:

- Product returned within 30 days of purchase will be accepted for full refund. No questions asked.
- We are happy to repair or replace equipment within its warranty period. DenMat retains sole discretion to determine whether repair or replacement is appropriate.
- Equipment within warranty will be repaired according to the terms of the specific equipment warranty.
- Equipment outside warranty will be repaired according to the terms of the specific equipment warranty, with all charges (including parts, labor) paid by the customer.
- Please be aware that your account may be subject to shipping charges.
- Equipment returned for credit 31 – 60 days from date of purchase will be subject to a 15% restocking fee.
- Equipment returned within 30 days from date of purchase will be given full credit of the purchase price.
- Incorrect product shipped to a customer: Products will be promptly replaced with correct product upon DenMat issuing RMA number. If the incorrect products have not been received by DenMat within 30 days of issuance of the RMA number, the customer will be charged for the products. All returned products must be in original, unopened condition.
- Damaged products: Products that have been damaged in-transit to the customer will be replaced, within 30 days of receipt by the customer, at no charge to the customer by DenMat.

Indemnity

You agree to hold DenMat and its respective officers, directors, employees, agents, successors, and assigns harmless from and against any claim, loss, damage or expense, including attorney's fees and court costs, arising from or related to your use or misuse of DenMat's products.
